

BUILD THE INTERNET OF THINGS WITH US

Cumulocity GmbH is a revolutionary, customer-centric company full of talented, enthusiastic people who enjoy coming to work every day. We keep sane working hours while still taking care of business. If this sounds like you, join our team.

Working Student Embedded Development (part-time)

What you'll do:

- Bring devices such as Arduino, mbed.org and many more into the cloud.
- Connect sensors, smart meters and IoT kits.
- Support developers and customers in bringing their devices into the cloud.

What you need to bring along:

- Good knowledge of C or C++.
- Some experience in embedded development.
- Some experience in networking (TCP/IP and other).

What would be great:

- Knowledge of HTTP, REST, JSON.
- Knowledge of mobile networking (GSM, SIM cards, AT commands).
- Knowledge of agile development and test-driven development.

What you'll get:

- Work with latest hardware technology and mobile networking.
- Exciting projects in an international environment.
- Startup atmosphere and nice colleges.
- "Software development at highest standards" (experts about us).

We are an international company, with international customers and development located in Germany, Poland and Portugal. You must be able to fluently speak and write English.
All positions are located in Düsseldorf, Germany.
