

# BUILD THE INTERNET OF THINGS WITH US

Cumulocity GmbH is a revolutionary, customer-centric company full of talented, enthusiastic people who enjoy coming to work every day. We keep sane working hours while still taking care of business. If this sounds like you, join our team.

## Working Student Java and Cloud Development (part-time)

### What you'll do:

- Design and implement our Java-based server software.
- Be part of the whole development lifecycle from specifications and mocks over implementation to documentation, troubleshooting and support.
- Work together with customers and our DevOps team.

### What you need to bring along:

- Good knowledge of Java.

### What would be great:

- Knowledge of JavaEE and Spring.
- Knowledge of relational and/or NoSQL database systems.
- Knowledge of agile development and test-driven development.

### What you'll get:

- Exciting projects on latest technology in an international environment.
- Startup atmosphere and nice colleagues.
- "Software development at highest standards" (experts about us).

We are an international company, with international customers and development located in Germany, Poland and Portugal. You must be able to fluently speak and write English.  
All positions are located in Düsseldorf, Germany.
