

The world of scientific research is changing. Due to technological transformations, globalization and competition, science is facing new integrity challenges and ethical dilemmas.

As a result, doing research is becoming increasingly challenging. Questions come up: What is plagiarism? What is intellectual property? How to use data properly? How to quote? And many more...

How can you help?

We are developing an interactive educational module on research integrity. At this stage we have a prototype and we need your input to improve it!

When and where can you test the tool?

We would like to try out our tool with you at the PRINTEGER European Conference on Research Integrity. This conference takes place from February 05-07, 2018, at the University of Bonn.

The try-out will take place on February 07, 2018, 11:30 am - 2.30 pm (including one hour lunch break). Students, teachers, researchers and interested people are welcome to use and test the tool and give us feedback.

We get your feedback - What do you get?

For your participation, you will get credits for the Certificate of International Competence.

Furthermore, we would like to invite you to a joint lunch.

And best of all: you get an insight into the research culture of tomorrow!

How ?

Try-out an educational tool on research integrity.
Please bring your Notebook!

Where ?

University of Bonn, main building

When ?

February 07, 2018, 11:30 am - 2.30pm

Reward ?

Credits for the Certificate of International Competence and free lunch.

About us

In view of the scientific developments that lead to new integrity challenges, the European Commission initiated the PRINTEGER project in 2015. The project aims at enhancing research integrity by promoting a research culture in which integrity is part and parcel of what it means to do excellent research.

The development of an educational tool on research integrity is one of the tasks of the PRINTEGER project.
